

About your child

Child's initials: _____

Child's D.O.B.: _____

Child's gender: _____

Is your child right or left handed? _____

How many weeks into your pregnancy were you when you gave birth?

Were there any problems at the time of birth? If so, please describe:

Has your child had any conditions affecting the eyes or brain? If so, please describe:

Do you have any concerns about your child's vision? If so what are they?

Instructions to parents

We want to find out what children at different ages can and cannot see. We want to know about how your child behaves **now** but not when younger.

These questions are designed for a range of ages, so some questions may seem odd. Your child may have difficulty with some behaviours listed below but not others – this is normal.

Also you may notice that some of the behaviours described occur occasionally when your child is tired, this is common.

For each of the items listed, please could you tick the box which best fits with your child's **present** behaviour.

never/ rarely/ sometimes/ often/ always/ not applicable (NA)

Questions indicating upper and lower visual field difficulties	Never	Rarely	Sometimes	Often	Always	NA
Does your child...						
1. trip or bump into things on the floor?
